

N5 CB5 Genetic Engineering HW REVISION RESOURCE & RESEARCH TASK

1. Create a revision resource to help you remember the sequence of events involved in genetically engineering a bacterial cell.

Your resource could be a poster, a game, a card sort, a quiz or any other suitable item.

2. In Life on Earth subunit 5, Food Production, you learned about *GM* crops. Find out about a specific *GM* crop and write a short essay (in your own words) about the new features the crop has had genetically engineered into it.
